

**Notice of New Participation
in the Chubu Area Hydrogen Utilization Council**

Admatechs (Headquarters: Miyoshi-shi, Aichi; President: Osamu Nakano) has joined the Chubu Hydrogen Utilization Council (hereafter referred to as "the Council") as an observer member as part of its efforts to become carbon neutral.

The Council is promoting the following activities with the aim of achieving large-scale implementation and stable use of hydrogen in the Chubu region.

- First in Japan to realize the hydrogen society in the Chubu region, where manufacturing is thriving, and contribute to industrial structural reforms toward carbon neutrality.
- Build supply chains in coastal and inland areas that enable hydrogen utilization across a wide range of industries.
- Prospects for social implementation in the late 2020s and 2030s
- Promote the creation of a network of friends for hydrogen utilization (40 private companies by April 2024).

As a member, we are working to reduce CO₂ emissions by reducing the use of LPG and LNG and using carbon-free gases, and will promote the use of hydrogen as part of our efforts.
