**Exhibition at "nano tech 2025: The 24th International Nanotechnology Exhibition & Conference"**

~ Introducing new development particles using innovative synthesis technology ~

Admatechs Co., Ltd. will be exhibiting at the "nano tech 2025: The 24th International Nanotechnology Exhibition & Conference," which will be held for three days from January 29th (Wed) to 31st (Fri), 2025, at Tokyo Big Sight (Ariake, Koto-ku, Tokyo).

**■Admatechs Co., Ltd. Booth Overview (Booth No.: East Hall 4, 4M-13)**Register for attendance here → <https://www.nanotechexpo.jp/en/> Our website: <https://www.admatechs.co.jp/en/>

Our company began with the development of ADMAFINE, and now boasts the world's top market share by meeting the needs of a wide range of fields.

In pursuit of even higher quality products, we will introduce functional fine particles using new synthesis methods.

**■Main Exhibits**

New Products: "Metal Nanoparticles (Low-Temperature Sinterable Silver Nanoparticles)" and "Admaraisin (Refractive Index Adjusting Nano Composite Particles)" using new synthesis methods.

New Products: "Composite Particles" that have been spheroidized using our unique VMC method, incorporating elements other than Si and Al.

New Technology: products line up that open up cutting-edge materials for semiconductors, including "Admafine," "Admanano," and "Admafuse," along with the latest processing technologies that support functional enhancement (surface treatment, classification technology, etc.).

**■Exhibition Overview**

Dates: January 29th (Wed) to 31st (Fri), 2025 Hours: 10:00 AM to 5:00 PM

Venue: Tokyo Big Sight, East Hall (3-11-1 Ariake, Koto-ku, Tokyo)
