Signing of a Basic Agreement on Mutual Cooperation for the Development of a Supply Chain for Hydrogen, Ammonia, and Related Technologies

Admatechs Co., Ltd. (Headquarters: Miyoshi City, Aichi Prefecture; President and CEO: Osamu Nakano) has signed a Memorandum of Understanding (MOU) with *the Chubu Region Hydrogen and Ammonia Society Implementation Promotion Conference*, concluding a basic agreement on mutual cooperation for the development of a supply chain for hydrogen, ammonia, and other related materials.

This agreement aims to strengthen regional and interregional collaboration in the supply and utilization of hydrogen and ammonia, contributing to the realization of a sustainable energy society.

■ Background and Objectives

To achieve carbon neutrality by 2050, the adoption of renewable energy and the implementation of next-generation energy sources such as hydrogen and ammonia are becoming increasingly important.

We are committed to accelerating the energy transition by working together with local industries, governments, and research institutions to develop robust supply chains.

■ Overview of the Agreement

- Sharing information and collaborating on hydrogen and ammonia supply and demand
- Cooperating in surveys and studies toward supply chain development
- Promoting social implementation through collaboration with local communities

■ Future Outlook

Going forward, we will continue to actively engage in technological development and demonstration projects aimed at decarbonizing society, including the development of energy infrastructure in collaboration with local communities.
